(54) Title: RESULT EXPECTATION GAME SERVICE METHOD UTILIZING COMMUNICATION NETWORK

(57) Abstract: The present invention relates to a result prediction game that is played in such a way as to predict the result of a certain event and bet money or cyber money, such as a betting game. There is disclosed technology related to the result prediction game in which customers predict the result of a certain event and determine payouts, they will receive when the result of the event is determined, in advance. Accordingly, in accordance with the present invention, there is provided a method for a result prediction game service in which the payouts that the customers will receive later are determined in advance, so that the result prediction game can be enjoyed at every stage of the game and payouts that the customers do not intend to receive can be prevented.
